

Florida's Health Care Safety Net

**A Comprehensive List of State and County Based
Resources for the Uninsured**

September 2008

**FLORIDA
MEDICAID** 

Forward

This document represents a comprehensive list of programs available and serving the health care needs of the uninsured in Florida. Other resources exist that outline various community social service programs, however, this is the first to focus entirely on health care. While it is intended to be a comprehensive, exhaustive list of all health care resources provided in Florida's communities, the sheer volume of public and private programs available make it likely that some were omitted from this document. The authors would like to gratefully acknowledge the assistance and input of the various agencies and partners in the state, and encourage anyone with additional information on any programs that may have been overlooked to contact the Office of Medicaid Research Contracts and Evaluations.
